

Datasheet for: EU-US0100-Iso-117V

Product Type: Use American Appliances in Europe

100VA 230V to 117V Isolating Transformer with one American socket. Suitable for vintage & sensitive lower power audio equipment. Employs an inter-winding electrostatic screen to attenuate mains interference.

VA 100 Input Voltage 230

Input Termination Schuko plug

Input Current 0.43 0.8 amps Output Voltage 117

Output Termination One US Nema 3pin socket **Product Case** UKS1 Small Grey steel case Dimension Ht:75 L:190 W:116 (mm)

Weight 2.5kg

Commodity code: 851539130

Primary Protection Self resetting thermal fuse Product Type Isolating transformer

Conforms to EN61558-2-6 CE & RoHS Standard

Declaration of Conformity: Airlink Transformers declare that the product EU-US0100-Iso-117V conforms to current European safety and EMC regulation EN61558-2-6 (Safety Isolating transformer) CE & RoHS compliant. Manufactured

Declaration by the Exporter: The exporter of the product covered by this document declares that these products are of EU preferential origin.

and goods delivered and invoiced, do not contain any of the hazardous substances as mentioned in the 2011/65/EU European directives (RoHS) Particularly these products do not contain: Heavy metals such as Pb, Cd, Cr6+

RoHS Certificate: Airlink Transformers certifies and testifies that all the products
