

## **QMS002 - Quality Policy**

Airlink Transformers, established as Albury Services in 1982, specialise in the manufacture of Toroidal transformers and cores, supplying to an international market of electronic companies.

The policy of the Company is to provide a high level of workmanship and quality, which guarantees that products received fulfil and exceed customer expectations. The strategic direction has been defined as exploring new markets to sell existing products, whilst maintaining the existing customer base with a high level of product and service.

To this end, Airlink Transformers have developed and documented a Quality Management System to comply with all aspects of the BS EN ISO9001 International Standard for Quality, as well as other applicable requirements, and maintain a culture of continuous improvement.

All personnel understand the importance of Quality and abide by the procedures outlined in the Quality Management System, as well as relevant statutory & regulatory/legal requirements. Management ensure that all personnel in the organisation are fully dedicated to the Quality Management System and their individual objectives and responsibilities.

The Company are therefore committed to continually improve using several Key Performance Indicators, which are closely monitored by management.

This Policy and the measurable objectives mentioned above are continually reviewed for suitability at Management Review Meetings.
